"How to Locally Save and Retrieve a SAD"

The following 'Functional Note' provides registered users of the ASYCUDA World (AW) system with the information necessary to enable them to locally save and retrieve a SAD.

For a number of reasons (e.g. documents missing, incomplete information, etc.), it is possible for the SAD the user is currently working on, to be saved locally and retrieved at any time.

The facility is also useful for a company that imports or exports the same product (e.g. petroleum). To facilitate the process a fully completed SAD can be saved locally and used as a template. Each time the company imports or exports the same product, the template can be retrieved and only specific data (e.g. value, volume, etc.) updated.

How to locally save a SAD

This is done as follows:

1. Once a new SAD is opened and data inserted, the declaration can be saved locally at any time during the process
